

# SAHIL PATIAL

+91-7876369379 | Chandigarh, India | patial2001@gmail.com | linkedin.com/in/sahil-patial45 | github.com/Patial-45

Full-stack software engineer with production experience building AI-integrated systems (React, Node.js, PostgreSQL) and independent projects applying LLMs to real-world matching problems. Pursuing MCA in AI/ML at Chandigarh University.

## Experience

### De Corporate Consulting Pvt. Ltd.

Senior Operations Associate

Sep 2025 – Present

Chandigarh, India

- Architected and built an AI-powered client-job matching platform end-to-end using React, TypeScript, Node.js/Express, PostgreSQL with pgvector, Elasticsearch, and Redis/BullMQ, combining semantic (vector) search with a custom explainable scoring engine to rank and justify client-job matches.
- Built the company's core database from scratch to 1,000+ verified companies and 20,000+ verified corporate contacts across BFSI, GCCs, Tech/SaaS, Healthcare, VC/PE, and more, alongside a client database of 1,000+ (300+ concurrently active).
- Leading a 10-person pilot of the matching platform ahead of full production rollout, surfacing 180+ job matches daily across the team, including 80+ senior-level roles personally sourced and vetted daily.
- Built and shipped internal automation tooling (Chrome extension for LinkedIn/job data scraping, email-scraping tool, AI-agent-based job search workflows) adopted across a 30–40 person operations team to increase throughput.
- Lead a 3-person database team: designed their training process, review all work daily before merging, and manage task distribution and skill development; also serve as technical mentor and job-search advisor for the broader client-facing team.

## Projects

### AI-Powered Resume Scoring & Job Matching Platform | TypeScript, MERN Stack, Python, OpenAI API

[Link](#)

- Redesigning and extending a resume-JD matching system that uses the OpenAI API to score compatibility with 92% accuracy; currently rebuilding the UI and expanding ATS optimization features and the real-time resume builder.
- Built an automated job-scraping pipeline (BeautifulSoup + Selenium) pulling 500+ targeted listings daily, cutting job search time by 70%.

### Online Freelance Marketplace | MERN Stack, JWT, Redux, RESTful API

[Link](#)

- Built a production-style marketplace with user registration, project posting, multi-user bidding, and secure payments; JWT + RBAC authentication securing 100+ users.
- Architected Node.js/Express REST APIs (200ms avg response) and optimized the React frontend with Redux, code splitting, and lazy loading, cutting page load by 35%; used MongoDB compound indexing for efficient search/pagination.

## Technical Skills

|                |                                                                                          |
|----------------|------------------------------------------------------------------------------------------|
| Languages      | JavaScript (ES6+), TypeScript, Python, Java, C/C++                                       |
| Frontend       | React 19, Redux, TanStack Query, React Hook Form, Vite, Material UI, HTML5, CSS3         |
| Backend        | Node.js, Express.js, REST APIs, Prisma ORM, JWT Auth, OAuth, BullMQ, Zod                 |
| Databases      | PostgreSQL (pgvector), MongoDB, MySQL, Redis, Elasticsearch                              |
| AI/ML          | OpenAI API, Google Gemini API, Semantic Search & Vector Embeddings, Prompt Engineering   |
| Cloud & DevOps | AWS, GCP, Docker, Nginx, Git, CI/CD                                                      |
| Core CS        | OOP, DBMS, Operating Systems, Computer Networks, System Design                           |
| DSA            | Java problem-solving: trees, graphs, dynamic programming, recursion, complexity analysis |

## Education

### Chandigarh University

Master of Computer Applications – Artificial Intelligence & Machine Learning (CGPA: 9.0)

Mohali, Punjab

Jan 2026 – Present

### Chandigarh University

Bachelor of Computer Applications

Mohali, Punjab

Sep 2022 – Jun 2025

## Certifications

Oracle Cloud Infrastructure 2025 Certified Generative AI Professional • Oracle Data Science Professional • Oracle DevOps Professional • Prompt Design in Vertex AI (Google Cloud) • McKinsey Forward Program • React JS (Infosys Springboard)

## Extra-Curricular

### Re-Imagine – National-Level Web Development Hackathon, Sheryians Coding School

Sep 2024

- Competed nationally as part of a 3-member team, designing and deploying 2 full-stack web applications (React, Node.js, MongoDB) across 2 elimination rounds within a 36-hour sprint.
